

REVIEW OF OPERATIONS

Quarter Ended 31 March 2007

The Company continues to focus on two major fronts; generating returns from existing operations, and expanding the business through acquisition of additional surgeries and facilities.

Operating Results

Before corporate and administration costs, EBITDA (earnings before interest, tax, depreciation and amortisation) represented a return on sales of almost 30%. Quarterly receipts from customers rose to \$426,000 for the quarter, which exceeded expectations given the impact of several major holidays during the period. Revenue is expected to grow in the 4th quarter through a combination of additional dentists at our clinics, and further acquisitions.

The Company continues to pursue its strategy of delivering efficient “back of house” systems on the basis of reducing fixed costs as a % of revenue. A key part of this effort is the implementation of a new enterprise accounting and reporting system, which will facilitate a centralised shared services approach, along with an increased ability to deliver a range of services to clinics under management.

These initiatives are all aimed at a more rapid scalability of the business through the acquisition and integration of additional clinics.
